This is the About page.

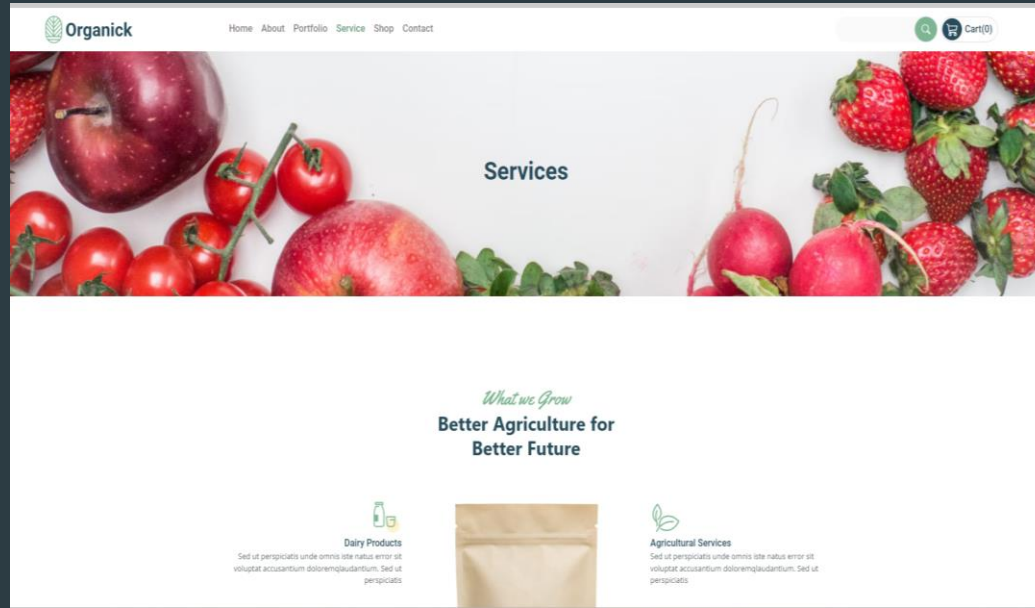

An about page is a section of a website where people go to learn about the website they are on. Readers will visit this section for many reasons and with various questions they want answered. I have added photos of the company and its products to the about page and added some information about the company and the product.

➤ Shop and Shop Single

A shop page is a placeholder for a post type archive for products. It may render differently than other pages on your site. The product of this company is organic fruits and vegetables, so in the shop page we have added all the products of this company, and the product has been added by creating a card in which the photo of the product is on the top, the name of the product is on the bottom and the price of the product is below it so that the users can see the product. Easy to buy

➤ Service and Service Single

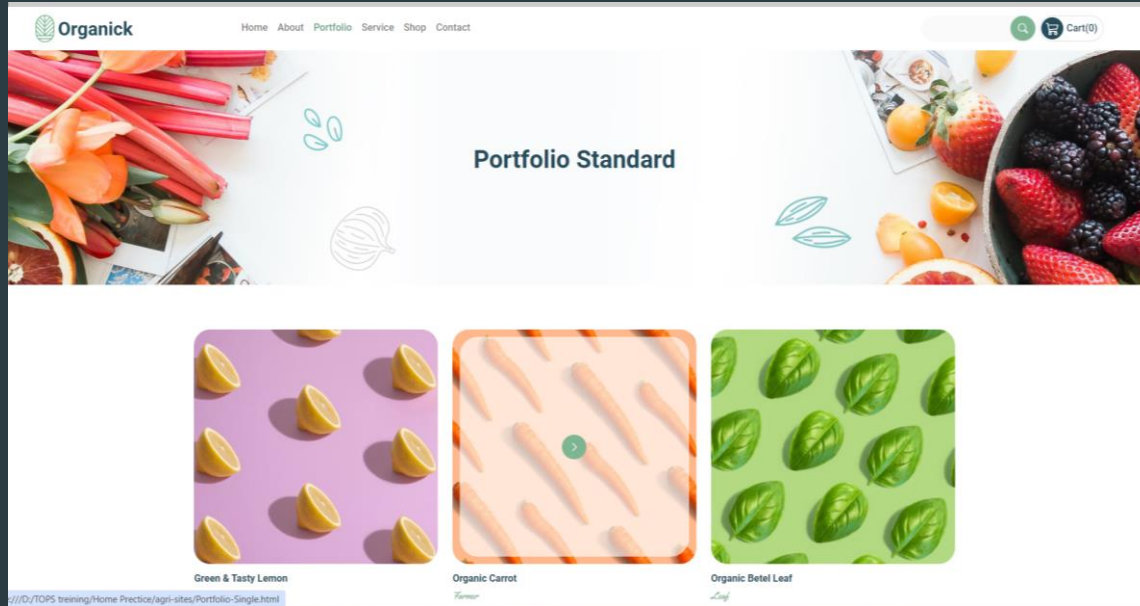

Service pages should serve as sales collateral for your business, showcasing your expertise in the different areas of your business. The services provided by the company in this website are described in the service page. This website is for organic fruits and vegetables, so if the user buys these vegetables and fruits, how to service them is included in the service page.

➤ like this company :

- Dairy Products
- Agricultural Services
- Organic Products
- Store Services
- Fresh Vegetables
- Delivery Services

Provides service.

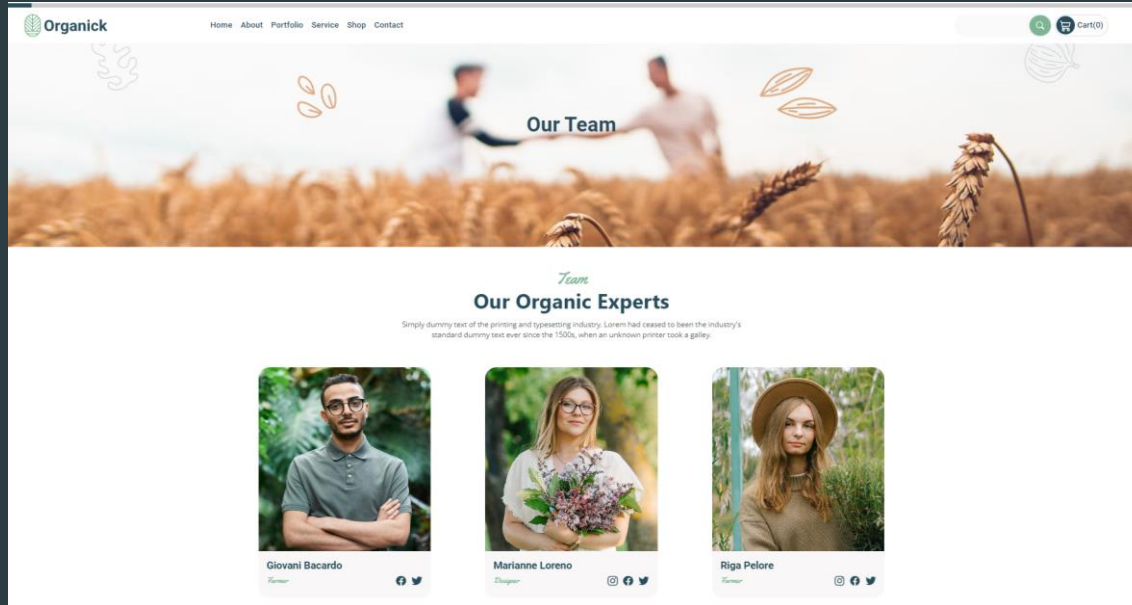

➤ Portfolio and Portfolio Single

A portfolio website is a place where you can showcase your skills and previous work. It helps you establish your authority and credibility in the industry you're working in. You can include information about your past projects, making potential clients trust you more.

This company is trying to add some products on the website which are demanded by the users like.

- Green And Tasty Lemon
- Organic Carrot
- Organic Betel Leaf
- Natural Tomato
- Black Raspberry
- Honey Orange

Having an up to date team page is now an essential part of a website and here is why... People like to do business with those that they know and trust in, having a “Meet The Team” page help potential new clients or customers get closer to the point of knowing, liking and most importantly trusting you.

As the team of this company consists of six members which are as follows.

- Giovanni Bacardo (Giovanni Bacardo is a Farmer)
- Marianne Loreno (Marianne Loreno is a Designer)
- Riga Pelore (Riga Pelore is a Farmer)
- Keira Knightley (Keira Knightley is a Farmer)
- Scott Lawrence (Scott Lawrence is a Designer)
- Karen Allen (Karen Allen is a Farmer)

All team members have different jobs in the company.

A contact us form helps you keep track of all the inquiries made by your website visitors. As you grow your business, you can expect to get an increasing number of inquiries about your products and services. The best way to receive all of them conveniently in your inbox is through your site's contact us page and form. Contact forms essentially have two main purposes: lead generation and a communication channel for existing clients. Website contact forms help generate leads by making it easy for a potential customer to submit a question or comment.

This website has a page called contact in which users can write their ,

- Name
- email
- company
- subject

and send to the admin of the company.
